LOW VISCOSITY, LOW TEMPERATURE CASTING SYSTEM CPE-1517

Potting Compound CPE-1517 is a filled undiluted epoxy system with good resistance to impact and will cure at moderate temperatures. This system is recommended for potting devices such as connector shells from which wires may protrude directly through the epoxy. It adheres well to insulated wires.

CASS Adhesives' CPE-1517 is identical to Bacon Industries' Potting Compound 103 in chemical composition. Bacon Industries' Potting Compound 103 has been labeled, packaged, tested and certified for aerospace applications. CASS Adhesives CPE-1517 is an industrial grade adhesive, however it may be used for aerospace applications if proper certifications have been issued and the material meets all of the manufacturer's specification requirements.

This system is available in a number of colors besides black (see Note 1).

NOTES

1. This system is available in other colors as listed below. The directions for use are the same and the cured properties are essentially the same.
   - Green: CPE-1518
   - Orange: CPE-1519
   - Red: CPE-1520
   - Yellow: CPE-1521
   - Blue: CPE-1522
   - Natural (grey): CPE-1523

2. After a post cure of 4 hours at 212$^\circ\text{F}$, the Glass Transition Temperature by DSC is 152$^\circ\text{F}$.
3. 1,1,2-trichloro-1,2,2-trifluoroethane.

INSTRUCTIONS FOR USE:

Mix contents thoroughly each time before removing material. Place 100 parts by weight of CPE-1517 into a glass or metal container. Add 15 parts by weight of Activator CPA-138 and mix well with a mechanical stirrer for five minutes. Vacuum degas if required and apply. Cure as indicated.

FOR INDUSTRIAL USE ONLY! WARNING!

These materials, including vapors, may cause injury to the skin following prolonged or repeated contact. Use with adequate ventilation. For health and safety information, refer to the Material Safety Data Sheets for these materials.

SHELF LIFE:

The Shelf Life of these materials is greater than one year when stored in unopened containers at an average temperature below 85$^\circ\text{F}$.

AVAILABILITY:

Adhesive CPE-1517 and Activator CPA-138 are available in bulk kits as well as premixed and frozen in Freeze-Paks.
